input.1p

Java

```java
package q35961;

public class CharacterDemo {
    public static void main(String[] args) {
        char ch1 = 'A';
        char ch2 = '7';
        char ch3 = '*';

        // Checking if ch1 is a character
        System.out.println("ch1 is a letter: " +
                Character.isLetter(ch1));

        // Check if ch2 is a character
        System.out.println("ch2 is a letter: " +
                Character.isLetter(ch2));

        // Check if ch2 is a digit
        System.out.println("ch2 is a digit: " +
                Character.isDigit(ch2));

        // Checking if ch1 is a letter or digit
        System.out.println("ch1 is a letter or digit: " +
                Character.isLetterOrDigit(ch1));

        // Checking if ch3 is a letter or digit
        System.out.println("ch3 is a letter or digit: " +
                Character.isLetterOrDigit(ch3));
    }
}

```
